Prior to configuring your machine for DuqNet wireless you need to initialize your MultiPass account (credentials that you will be using for wireless). To do so, visit www.duq.edu/multipass and click the link for Initialize MultiPass Account. Once you've followed the on-screen prompts and have initialized your account you can proceed with the following instructions. Keep in mind that you will use this password that you've just created to setup your wireless connection.

Review the Duquesne Wireless Airspace Policy:

http://www.sites.duq.edu/cts/policies/policy_duqnet_wireless.shtml

This packet is used for connecting your Windows Vista or Windows 7 computer to the DuqNet wireless network.

1. Go to Start (or the windows icon in the lower left hand corner)
2. Click Control Panel
3. Click on Network and Internet
4. Click on Network and Sharing Center
Connecting To DuqNet Wireless (Windows Vista & Windows 7)

5. Click on Manage Wireless Networks (left hand side)

![Manage Wireless Networks](image)

6. If you have already added DuqNet remove it from the list by selecting it and clicking on “Remove”

Manage wireless networks that use (Wir

Windows tries to connect to these networks in the or

Add | Adapter properties | Profile types

Networks you can view (1)

DuqNet  Security: WPA2-En

7. Click Add
8. Choose Manually Create a Network Profile

![Manage Wireless Networks](image)

How do you want to add a network?

Manually create a network profile

This creates a new network profile or locates an existing network and saves a profile for the network on your computer. You need to know the network name (SSID) and security key (if applicable).

9. Enter the information as follows
   Network Name: DuqNet
   Security type: WPA2 – Enterprise

This document can be found on www.duq.edu/duqnet
Updated on 3/6/2011
Encryption: AES

10. Click Next, Then close

11. Back on the manage wireless networks screen...

12. Right click DuqNet

13. Go to Properties

14. Security tab
15. Click on Settings
Uncheck Validate server certificate
16. Click Configure and Uncheck Automatically use my Windows log in name

17. Click OK

If running Windows 7

18. Go back to the Security Tab option
19. Under Advanced Settings
20. Check Specify Authentication mode
21. Choose User Authentication
22. Click OK

23. Double click wireless icon by the time. (5 bars)
24. Enter your multipass username/password
25. You should be connected!

If not please contact the CTS Help Desk at 412-396-4357 for assistance.
