The Duquesne University Honors College recognizes that many of its students enter the University with course credits they have earned through either Advanced Placement examinations or special courses taken in high school or at other institutions of higher education. In order to allow its student members to utilize these credits while maintaining the selectivity and rigor of its programs, the Honors College has established the following policy for Advanced Placement and Advanced Standing credits.

**For Students Who Enter the Honors College in the Fall 2010 and Later**

**AP English**—The Honors College will not accept AP English examination grades in lieu of the Freshman Honors Seminar (I.H.P. 104 and 105). All Honors College students are required to take the full two-semester sequence of this course.

**AP Calculus**—The Honors College will accept grades of 4 or 5 on either of the AP Calculus examinations in lieu of its mathematics requirement: either Calculus I (I.H.P. 115) or Problem Solving with Creative Mathematics (I.H.P. 125).

**AP Statistics**—The Honors College will accept grades of 4 or 5 on the AP Statistics examination in lieu of its mathematics requirement: either Calculus I (I.H.P. 115) or Problem Solving with Creative Mathematics (I.H.P. 125).

**Advanced Standing Credits**—The Honors College will review advanced standing credits earned by students at other educational institutions on a case-by-case basis. Consideration will be given only to those credits that have been accepted by the University. In order to have credits considered, students must have earned a minimum grade of B in the course and submit a copy of the course syllabus and copies of all writing assignments or major projects to the Honors College director for consideration. The director will review these materials to determine the degree to which these courses compare in rigor and content to courses offered by Honors College. Submission of materials does not guarantee acceptance of the credits in lieu of honors courses at Duquesne.
