As pharmacists see more obese patients and pharmacotherapy becomes increasingly complex, they need a resource that puts all the necessary information in one place and makes it easy to use.

With Demystifying Drug Dosing in Obese Patients, that resource is here, delivering:

- Fully-referenced dosing recommendations for specific drugs
- Dedicated chapters on antimicrobial dosing, anticoagulants and antiplatelets, antiepileptics, analgesics, antineoplastic medicines, and more
- Guidance on immunosuppression and medication absorption in bariatric surgery
- Tips for adult, pediatric, ambulatory, acute, and critical care
- Pharmacokinetic parameters in obese patients

Summary tables, examples, and sample calculations put practical information at practitioners’ fingertips. Content by nationally recognized authors—edited by credentialed practitioners who’ve been there—supports scientifically sound decisions.

Contents

Contributors and Reviewers
Foreword
Preface
Acknowledgments

Chapter 1. Introduction to Dosing Medications in Obese Patients
Brandon R. Shank, PharmD, BCOP

Chapter 2. Antimicrobial Dosing in Obesity
Alexander H. Flannery, PharmD, BCPS; Aaron M. Cook, PharmD, BCPS; and Craig A. Martin, PharmD, BCPS

Chapter 3. Anticoagulants and Antiplatelets
Stacy Elder, PharmD, BCPS

Chapter 4. Critical Care
David E. Zimmerman, PharmD, BCPS

Chapter 5. Antiepileptics
David E. Zimmerman, PharmD, BCPS

Chapter 6. Dosing Antineoplastic Medications in Obese Patients
Brandon R. Shank, PharmD, BCOP

Chapter 7. Pediatrics
Emily C. Benefield, PharmD, BCPS; Jacquelyn F. Ouellette, PharmD

Chapter 8. Immunosuppression Dosing in Obese Solid Organ Transplant Recipients
B. Andrew Mardis, PharmD; Caitlin R. Mardis, PharmD; and Nicole A. Pilch, PharmD, MSCR, BCPS

Chapter 9. Analgesics
Suzanne Amato Nesbit, PharmD, BCPS, CPE; Julie Waldfogel, PharmD, CPE

Chapter 10. Medication Absorption in Bariatric Surgery
Branden D. Nemecek, PharmD, BCPS
