Course Description
Dr. Apprey will be considering the analysis of transgenerational transmission of destructive aggression. Dr. Apprey utilizes ordinary and extraordinary stories of returning to oneself as part of the narrative on transgenerational transmission. In his paper he poses the following questions: What basic conceptual assumptions could facilitate how we theorize transgenerational transmission? What impediments present themselves when we use existing psychoanalytic theories in inflexible ways as points of entry into the psychoanalytic exploration? Additionally, he brings a concept of resistance as provider of opportunity rather than as opposition.
