

Palumbo-Donahue  
School of Business

## Finance

**The Finance major is comprised of courses in two broad areas: Corporate Finance and Investments.**

In **Corporate Finance**, students learn to analyze business opportunities to identify those that create value. Financial analysis boils down to sophisticated cost-benefit analysis for decision making in all aspects of business, and students majoring in Finance successfully pursue careers with major corporate and other organizations.

In **Investments**, students learn to structure portfolios of stocks, bonds and other financial assets that meet the objectives of institutional and individual investors. The curriculum helps prepare students who wish to sit for Level I of the CFA exam series, and many graduates in Finance successfully pursue careers in asset management and wealth advising.

### **Why study Finance at the Palumbo-Donahue School of Business?**

The Investment Strategy Institute (ISI) computer lab is dedicated to investment analysis with more than 20 Bloomberg terminals, which bring together real-time data on every financial market, breaking news, in-depth research, powerful analytics and communications tools in one fully integrated solution. The Bloomberg terminal is a very powerful tool that is used extensively in the profession and is a significant part of the Finance curriculum.

Finance students can participate in the Student Managed Investment Fund (SMIF) program under the guidance of faculty and industry professionals. This is a minimum two-year experience in which the total amount of funds available for students to manage exceeds \$1,000,000. The SMIF experience also provides opportunities for students to interact with investment professionals, many of whom are Duquesne alumni working near campus in downtown Pittsburgh.

Additional opportunities for professional and personal development are available to students who join the Financial Management Association and the Asset Management Group at Duquesne.

### **Career Prospects**

There are good career and intern opportunities for Finance majors with leading companies such as Federated Investors, PNC Corp., BNY, UPMC Health System, JPMorgan Chase and others. Many of these opportunities are in Downtown Pittsburgh, just minutes from campus.

### **Finance as a Value-Added Second Major**

Finance can be combined in a double major, and many students choose to combine it with Accounting, Economics, Entrepreneurship, Information Systems and Technology, Marketing and Supply Chain Management.

## Courses
