MSSCM

Master of Science Supply Chain Management

Impact an organization's bottom line by managing the supply chain.

Duquesne's MS in Supply Chain Management is designed for working professionals who want to advance their careers, seize opportunities and help organizations to create a competitive advantage.

The program format of online learning and face-to-face sessions provides flexibility and convenience along with opportunities to collaborate on real projects and network with industry leaders. Every MS-SCM course is offered in both online and hybrid formats.
