SPANISH Total Solar Eclipse ADVENTURE

August 7–14, 2026

PRE-TOUR
EXTENSION TO

*Madrid, Toledo,
Ávila, Segovia*

August 3–8, 2026

Dear Duquesne University Alumni and Friends,

Join Duquesne alumni and friends on an extraordinary adventure to witness the mesmerizing total solar eclipse on August 12, 2026, set against the stunning backdrop of the Mediterranean off the coast of Spain's island of Mallorca! During this eclipse, viewers will experience the unparalleled thrill of seeing totality with the Sun so low on the horizon that its silhouetted disk will be distorted into an oval by atmospheric refraction. The unique celestial geometry will create dramatic atmospheric effects not seen when totality is high overhead.

Our journey begins on August 7 with an overnight flight from the U.S. to the vibrant city of Barcelona, Spain. Upon arrival, we'll settle into the Gallery Hotel and explore the heart of Barcelona's Gothic Quarter, its historic streets, and hidden gems. Our first evening will culminate in a delightful tapas welcome dinner.

Over the next two days, we'll immerse ourselves in Barcelona's rich culture and architectural wonders, from Antonio Gaudí's iconic masterpieces like Casa Batlló and La Pedrera to the awe-inspiring La Sagrada Família and the enchanting Parque Güell. On a special visit, we'll dine under the stars at the Fabra Observatory and observe the night skies of Barcelona through a large vintage telescope. Enjoy a free day to explore Barcelona's many treasures at your own pace.

On August 11, we fly to the idyllic island of Mallorca. The next day, we'll visit the charming village of Valldemossa, nestled in the breathtaking Tramuntana mountains. As evening falls, we'll set sail from Port de Sollér, ready to witness the awe-inspiring total solar eclipse from the deck of our vessel. Experience the magic of totality as the sun sets, casting an otherworldly glow over the sea. We'll celebrate this unforgettable moment with a special eclipse dinner under the stars. The following day, enjoy leisure time in Palma de Mallorca.

Finally, on August 14, we'll return to the U.S. with cherished memories of this once-in-a-lifetime adventure. Join us on this captivating journey and be part of an extraordinary celestial event! For those wishing to extend their time in Spain, a pre-tour to Madrid, Toledo, and Segovia is offered.

Sincerely,

Jean Anne Hattler, PhD.

What to Expect

This Total Solar Eclipse Tour to Spain is designed for Duquesne University Alumni and Friends who are interested in observing a total solar eclipse and exploring the history and culture of Barcelona and Mallorca. This tour is a shared departure with Washington University in St. Louis alumni. Please also note that some accommodations, the eclipse viewing vessel, and the Fabra Observatory will be shared by University of Virginia Alumni, California Academy of Sciences, and other educational affinity groups. However, your joint departure with Washington University in St. Louis will have its own tour director, buses, and lecture space. As this is an astronomical event of international interest, hotels may be full of other eclipse travelers and independent travel groups from around the globe. In Madrid, expect temperatures ranging from 70°F (21°C) to 90°F (32°C); Barcelona typically has temperatures of 72°F (22°C) and 86°F (30°C), and Mallorca's average August temperatures are 75°F (24°C) to 88°F (31°C). Travel is by private coach, boat, and plane with a high-speed train on the Pre-Tour extension. Since some travel in Mallorca will be relatively remote, everyone must be flexible with time schedules and willing to explore spectacular natural areas and small towns. Program participants requiring

extraordinary assistance must be accompanied by someone who can and will provide all required assistance. To help you choose the trip best suited for you and to ensure the smooth and efficient operation of our tour, we describe this trip as moderately active.

Totality on August 12, 2026, will be relatively brief all across Spain, and from Port de Sóller on Mallorca, it will last 1m34s. The partial eclipse begins at 7:38 p.m. local time (Sun 12° high). Mid-eclipse follows at 8:31:32 p.m. with the Sun 2½° above the western horizon. We will provide an optimal viewing location in Mallorca to experience this phenomenon. Please keep in mind that because viewing the total solar eclipse will be weather-dependent, there is always a chance that passengers will not be able to view it or view it only for a short time. Neither Royal Adventures nor Duquesne University guarantees the viewing of the total solar eclipse. Keep in mind that unexpected schedule changes could affect the program. Your Tour Director will keep you informed of any planned activities changes. A sense of humor, flexibility, and patience will be greatly appreciated during this program, especially on Eclipse Day.
