"THE WHITEWASHING OF SEA SHANTIES - A COMPLEX HISTORY" BY HENRY STROBEL

Undergraduate Research and Scholarship Symposium Award in African Studies sponsored by Center for African Studies
Haul Away Joe/Thin Along Josey

Abstract

The majority of scholars agree that the term "sailor" can be broadly defined as a person who has spent a significant amount of time at sea. This definition includes both professional sailors and those who have worked on ships for various purposes. The term "sailor" is also used to describe individuals who have spent time on the sea, whether for leisure or to engage in nautical activities. The study of sailor culture is an interdisciplinary field that examines the social, cultural, and economic aspects of sailor life.

Cecil Sharp and English Folk-Culture

Cecil Sharp (1859-1924) was a British folklorist who is best known for his work in English folk-culture. Sharp was a pioneer in the field of English folklore and his work has had a significant impact on the study of English folk-culture. Sharp's research focused on the collection and preservation of traditional English songs and dances, and his work has been influential in the development of modern folk music.

Conclusions

The study of sailor culture is an interdisciplinary field that examines the social, cultural, and economic aspects of sailor life. The term "sailor" can be broadly defined as a person who has spent a significant amount of time at sea, whether for leisure or to engage in nautical activities. The study of sailor culture is important because it helps us understand the experiences and traditions of sailors and their communities.
