Description: In an effort to meet the growing needs of athletic trainers in all practice settings we will be offering programming that addresses emergency preparedness/active shooter training, opioid drug overdose/Narcan administration and interprofessional education and communication

Educational Objectives:
At the completion of the presentations, participants will be able to:

**Opioid Considerations for the Athletic Trainer**
- Identify and explain red flags for opioid abuse/overdose including the need for administration of Naloxone.
- Administer Naloxone (Narcan) Rescue Kits.
- Construct and modify school or workplace protocols related to opioid overdose and emergency management
- Provide education, monitoring, and prevention of abuse of prescribed opioids.

**Active Shooter – Emergency Plan for School Safety**
- Develop the ability to identify common items found in common areas that could be used in an active shooter event to protect/defend themselves and students.
- Identify unsafe situations quicker to allow time to react safely to the unsafe problem
- Identify warning signs such as behavioral changes, performance and social/emotional changes

**Key Components to Enhancing Interprofessional Education and Collaborative Practice in the Clinical Setting**
- Utilize current interprofessional terminology to enhance consistency and outcomes of communication in collaborative practice
- Develop teamwork strategies that emphasize the roles within professional collaboration in the clinical education setting
- Describe organizational resources that enable/enhance collaborative practice
