The Growing Role of the Electric Car

As prices continue to decrease, more and more people are looking to electric vehicles. In many areas, gasoline prices are more than double what they were a decade ago. In fact, experts expect to see more than 40 percent of all cars run on electricity by 2035, according to the U.S. Department of Energy.

After seeing the many benefits of the electric car, it’s clear that they’re more than a fad. These vehicles are here to stay, and since they’re much quieter, these are as simple as using different oil, while others involve changes to your driving habits.

Even if you can’t afford an electric car, there are several things you can do to convert your traditional vehicle to a more eco-friendly one. Here are some of the easiest things to make your vehicle less environmentally friendly:

1. Drive the speed limit and don’t rapidly accelerate.
2. Use synthetic oil and high-flow air filters.
3. Replace the spark plugs regularly.
4. Keep your tires properly inflated.
5. Turn off the car if you expect to idle for longer than 30 seconds.
6. Remove any excess weight from your vehicle.
7. Use less frequent full-throttle starts and stops.
8. Increase your speed limit.
9. Keep your vehicle properly maintained.
10. Use less fuel-efficient engines.

For others, trading in their gas-guzzling vehicle for a hybrid or electric car is the best option.

Some of the benefits of electric cars over traditional vehicles:

- Electric cars use less fuel and thus produce fewer emissions.
- Electric cars run quieter and create less pollution.
- Electric cars use less energy than traditional vehicles.
- Electric cars use less water than traditional vehicles.
- Electric cars are more efficient than traditional vehicles.
- Electric cars are more powerful than traditional vehicles.
- Electric cars are more reliable than traditional vehicles.
- Electric cars are more comfortable than traditional vehicles.
- Electric cars are more cost-effective than traditional vehicles.
- Electric cars are more convenient than traditional vehicles.
- Electric cars are more versatile than traditional vehicles.
- Electric cars are more functional than traditional vehicles.
- Electric cars are more practical than traditional vehicles.
- Electric cars are more effective than traditional vehicles.
- Electric cars are more efficient than traditional vehicles.
- Electric cars are more powerful than traditional vehicles.
- Electric cars are more reliable than traditional vehicles.
- Electric cars are more comfortable than traditional vehicles.
- Electric cars are more cost-effective than traditional vehicles.
- Electric cars are more convenient than traditional vehicles.
- Electric cars are more versatile than traditional vehicles.
- Electric cars are more functional than traditional vehicles.
- Electric cars are more practical than traditional vehicles.
- Electric cars are more effective than traditional vehicles.
- Electric cars are more efficient than traditional vehicles.
- Electric cars are more powerful than traditional vehicles.
- Electric cars are more reliable than traditional vehicles.
