Interested in a career in science? Underrepresented populations have the chance to stand out among their peers with a four-year, full tuition scholarship through Duquesne University’s Bayer School of Natural and Environmental Sciences.

The program accepts up to six highly qualified freshmen in the areas of chemistry and biochemistry, environmental science, biological sciences, forensics science and law, and physics. These freshmen will then become part of a cohort of students that have specialized programming for success, including special research opportunities and social outings.

As a Bayer School Scholar, you will:

- Get experience working in a research lab as early as freshman year
- Be mentored by top professionals in your field, including Bayer School faculty
- Participate in funded summer research experiences at Duquesne, Citizen Science Lab, and local research organizations, universities and science industries

Apply before January 11, 2019
For additional information visit: duq.edu/bayerschoolscholars

Duquesne’s Bayer School offers additional merit and need-based scholarships, ranging from $3,000 to $10,000. All accepted students to the Bayer School will be considered for these awards.
